ENVIRONMENTAL POLICY

Mike Wye & Associates is a Partnership whose very existence is based on sustainable philosophy. The Partnership aims to encourage people to protect not only their investment in a property but also more broadly the country's architectural heritage and skills that it represents. It also aims to promote the use of traditional and sustainable materials where appropriate as these offer many benefits over modern alternatives.

The Partnership pledges to;

- Aim to increase recycling and reduce waste and whenever it is identified.
- When sourcing products or raw materials, aim to reduce the carbon footprint and reject any unsustainable and environmentally damaging ingredients wherever practical.
- Strive to significantly exceed all environment legislation and act as a good example to other businesses.
- Continuously seek to improve environmental performance.
- Look to educate customers and business partners in the need for healthy and sustainable products, buildings and practices.

This policy is to be emphasised to all the Partnership employees and made available to our customers.

Mike Wye,
Senior Partner
